

One-Page AI Use Rules

Company: [COMPANY NAME]

Version: 1.0

Effective date: [DATE]

Owner: [AI / OPERATIONS / HR OWNER]

Use this one-page sheet to give employees basic rules before AI use spreads further.

The five rules

1. A human is always responsible. AI can help draft, summarize, brainstorm, and analyze. It does not own the final answer.
 2. Confidential stays confidential. Do not paste private company, customer, employee, financial, health, contract, or source-code information into unapproved AI tools.
 3. Check the output. AI can sound confident while being wrong. Verify facts, citations, names, numbers, legal claims, and code before relying on the result.
 4. Be honest about AI use. Disclose AI assistance when the recipient, customer, client, court, regulator, employer, or audience would reasonably care.
 5. Ask before risky uses. If AI is being used for decisions about people, sensitive data, customer-facing advice, legal/medical/financial topics, or automated workflows, pause and ask for review.
-

What approved AI tools may be used for

Employees may use approved AI tools to:

- brainstorm ideas and outlines
- summarize public or approved internal materials
- draft and edit emails, memos, and internal documents
- help with code, if the code is reviewed and tested
- translate or simplify non-sensitive text
- create first drafts of marketing copy, FAQs, checklists, or internal resources

A person must review the output before it is sent, published, shipped, or relied on.

What AI tools may not be used for without approval

Do not use AI tools to:

- paste customer, employee, health, financial, biometric, children's, source-code, contract, or

confidential data into unapproved tools

- make final hiring, firing, pay, promotion, discipline, lending, housing, healthcare, education, insurance, or legal-service decisions
 - generate customer-facing legal, medical, financial, or professional advice without qualified human review
 - create deepfakes, voice clones, synthetic likenesses, impersonation, or deceptive content
 - install unapproved AI tools or connect AI tools to company systems
 - hide AI use when disclosure is required or expected
-

Data traffic light

Green — generally okay in approved tools

- public information
- generic industry facts
- non-sensitive brainstorming prompts

Yellow — use only in tools approved for internal data

- internal memos
- draft strategies
- non-sensitive business documents
- anonymized or aggregated information

Red — do not enter unless specifically approved for that data type

- customer or employee personal data
- health, financial, biometric, children's, or government ID data
- contracts, pricing, source code, trade secrets, or NDA material
- anything regulated, privileged, confidential, or highly sensitive

When in doubt: do not paste it. Ask first.

Getting a new AI tool approved

Before using a new AI tool for company work, send [APPROVAL CONTACT]:

- tool name and website
- intended use
- who will use it
- what data will go into it
- whether outputs will be customer-facing
- whether the tool affects decisions about people

Use the New AI Tool Approval Checklist for quick review.
