

Vendor / Model Dependency Note

Purpose: Track which AI systems your project depends on and what could change if the vendor, model, API, platform, prompt, or settings change.

When To Use It

Use this when your project relies on an AI model, API, chatbot, plugin, no-code platform, automation tool, local model, dataset, hosted AI feature, browser extension, or agent workflow.

Update it when you change vendors, models, prompts, data-use settings, pricing assumptions, fallback options, or user-facing behavior.

What This Produces

You should finish with:

- a record of the AI vendor/model/tool your offer depends on
- links or locations for terms, settings, prompts, and account controls
- known limitations and support risks
- a fallback plan if the tool changes, fails, or becomes inappropriate for the workflow

Dependency Summary

Field	Answer
Project name	[PROJECT NAME]
Date	[DATE]
Owner	[OWNER]
Vendor, model, or tool	[VENDOR / MODEL / TOOL]
API or platform	[API / web app / no-code platform / plugin / local model / automation tool / other]
Model version	[MODEL VERSION OR UNKNOWN]
Feature or workflow using it	[WHERE IT IS USED]
Data sent to it	[DATA TYPES]
User-facing claim that depends on it	[CLAIM OR NONE]
Last reviewed date	[DATE]
Next review date	[DATE]

Vendor And Settings Review

Item	Notes	Link or location	Status
Terms or service terms			[Reviewed / Needs review / Not applicable]
Privacy policy or data policy			[Reviewed / Needs review / Not applicable]
Data-use settings			[Verified / Needs review / Not applicable]
Retention or logging settings			[Verified / Needs review / Not applicable]
Training or improvement settings			[Verified / Needs review / Not applicable]
Account security settings			[Verified / Needs review / Not applicable]
Rate limits or usage limits			[Reviewed / Needs review / Not applicable]
Pricing or billing assumptions			[Reviewed / Needs review / Not applicable]
Uptime, outage, or reliability notes			[Reviewed / Needs review / Not applicable]
Data export or deletion controls			[Reviewed / Needs review / Not applicable]

Prompt And Instruction Locations

Prompt or instruction	Where it lives	Who can edit it?	Last updated	Needs review?
System instruction				[Yes / No]
Main user prompt template				[Yes / No]
Safety or refusal instruction				[Yes / No]
Output formatting instruction				[Yes / No]
Evaluation or test prompt				[Yes / No]
No-code automation step				[Yes / No]

Known Limitations

Mark limitations that apply and add any project-specific notes.

- ☐ May hallucinate or invent details.
- ☐ May miss context from uploaded or pasted information.
- ☐ May produce outdated information.
- ☐ May produce biased, offensive, low-quality, or generic output.
- ☐ May fail on long, messy, unusual, or ambiguous inputs.
- ☐ May change behavior after a vendor update.
- ☐ May be unavailable due to outage, rate limit, billing issue, or account suspension.
- ☐ May create outputs that need IP, likeness, privacy, or platform review.
- ☐ Other: [NOTES]

Fallback Plan

Question	Answer
What happens if the vendor is down?	
What happens if the model changes behavior?	
What happens if output quality drops?	
What happens if the price changes?	
What happens if the vendor changes terms, data-use settings, or retention settings?	
Can users still complete the workflow without AI?	
Who decides whether to pause the feature?	
How will users, clients, or customers be told if the change matters to them?	

Vendor Change Impact

If the vendor changes behavior, terms, model quality, pricing, or settings, what would need to change?

Area	Possible impact	Action if it changes
Product behavior		
User-facing claims		
Disclosure or FAQ		
Data handling		
Pricing or margins		

Support process		
Testing or review		
Change log		

Review Carefully If

- You send user data, client data, sensitive data, credentials, payment data, or confidential files to the vendor.
- Your landing page makes claims that depend on a specific model capability.
- The vendor, model, price, terms, data-use setting, retention setting, or prompt changed since your last review.
- There is no fallback if the vendor is unavailable or output quality drops.

Short boundary: This worksheet is educational information, not legal advice. It helps you document vendor/model dependencies and spot questions to review. Review specific legal, privacy, contractual, security, platform, or regulatory obligations with qualified counsel or the appropriate advisor.
