

AI Update Tracker

System:

Business owner:

Technical owner:

Log owner:

Retention: life of system + [3] years

How to use this tracker. Every material change to an AI system, vendor tool, prompt, model, integration, or policy gets a log entry. Link entries to your AI Use Inventory, Risk Intake records, and Risk Register. The log supports audits, regulator inquiries, customer questions, and internal governance (the EU AI Act, for example, expects high-risk systems to keep a change history).

Log format

Each entry captures:

Field	Description
Entry ID	Sequential
Date	When the change was made (or scheduled)
Version	New version of the system
Previous version	Version before this change
Change class	Minor / Moderate / Material / Emergency
Summary	One-sentence description of the change
Components changed	Model / prompt / data / tool / guardrail / integration / infra / UX
Reason	Why the change was made
Expected impact	Plain language
Testing	Pre-deployment tests performed (functional, performance, bias, red-team)
Approver(s)	Who approved the change
Deployed by	Who executed the change
Rollout strategy	Full / canary / region-by-region / user-by-user
Rollback plan	Yes/No; method
Post-deploy check	What's monitored; result
User / customer notice	Yes/No; link to notice
Regulatory records updated	EU database / Colorado ADMT records / other
Linked documents	Inventory entry / risk intake record / risk register / incident records / vendor docs / tickets
Author of log entry	Name

Example entries

Entry #1 (small team - prompt fix)

Field	Value
Date	2026-04-17
Version	v1.3
Previous version	v1.2
Change class	Moderate
Summary	Updated the support chatbot system prompt so it stops quoting an outdated price
Components changed	System prompt
Reason	Two customers were quoted last year's price
Expected impact	Fewer pricing errors; slightly longer replies
Testing	Re-ran 12 saved test questions, including the 3 price-related ones
Approver(s)	Founder (also AI governance owner)
Deployed by	Founder
Rollout strategy	Full (single low-risk change)
Rollback plan	Restore the saved v1.2 prompt
Post-deploy check	Watched support replies for 3 days; no new pricing complaints
User / customer notice	Not required (quality improvement)
Regulatory records updated	No
Linked documents	Inventory entry AIS-001; complaint notes 2026-04-15
Author of log entry	Founder

Entry #2 (small team - vendor model upgrade)

Field	Value
Date	2026-04-25
Version	v2.0
Previous version	v1.3
Change class	Material
Summary	Switched the chatbot to the vendor's newer model after a deprecation notice
Components changed	Foundation model
Reason	Vendor is retiring the old model; the newer model tested as

	more accurate
Expected impact	Some tone and wording changes in replies
Testing	Re-ran the saved test questions; spot-checked 25 anonymized real conversations side by side
Approver(s)	Founder and operations lead
Deployed by	Operations lead
Rollout strategy	Internal-only testing for one week, then switched for customers
Rollback plan	Old model remains available from the vendor for 90 days
Post-deploy check	Support ticket volume stable after two weeks
User / customer notice	Customer FAQ updated
Regulatory records updated	No
Linked documents	Risk intake record 2026-04-22; vendor deprecation email
Author of log entry	Operations lead

Entry #3 (emergency - integration permissions)

Field	Value
Date	2026-05-02
Version	v2.0.1
Previous version	v2.0
Change class	Emergency
Summary	Disconnected the meeting-notes tool from the shared drive after it summarized a confidential folder
Components changed	Integration permissions
Reason	The tool had broader drive access than intended
Expected impact	Notes tool now works only on meeting recordings, not stored files
Testing	Confirmed the tool can no longer access the confidential folder
Approver(s)	Founder (same day); reviewed at the next governance meeting
Deployed by	IT contractor
Rollout strategy	Immediate
Rollback plan	Not applicable - access intentionally removed
Post-deploy check	Access audit after one week
User / customer notice	Internal note to staff about the new limits
Regulatory records updated	Issue added to the risk register; confirm with qualified review whether any notification duty applies if sensitive data was

	involved
Linked documents	Incident note 2026-05-02; risk register RISK-AI-006
Author of log entry	Founder

Review

- Monthly: business owner reviews log; spot-checks entries
- Quarterly: AI Governance Lead reviews logs across systems for patterns
- Annually: sample audit for completeness and accuracy
- On regulator inquiry: retrieve relevant entries

Preservation

- Don't delete entries; correct with a new entry if needed
- Archive the log with the system's records when a tool is retired, and keep the retired entry in your AI Use Inventory
- Retention aligns with sector rules and the longer of: operational need, EU AI Act 10-year (for high-risk), sector-specific retention, or 3 years minimum
