

AI Update Tracker

System: _____
Business owner: _____
Technical owner: _____
Log owner: _____
Retention: life of system + [3] years

How to use this tracker. Every material change to an AI system, vendor tool, prompt, model, integration, or policy gets a log entry. Use alongside the AI Change Management Process. The log supports audits, regulator inquiries (EU AI Act Annex IV requires change history), and internal governance.

Log format

Each entry captures:

Field	Description
Entry ID	Sequential
Date	When the change was made (or scheduled)
Version	New version of the system
Previous version	Version before this change
Change class	Minor / Moderate / Material / Emergency
Summary	One-sentence description of the change
Components changed	Model / prompt / data / tool / guardrail / integration / infra / UX
Reason	Why the change was made
Expected impact	Plain language
Testing	Pre-deployment tests performed (functional, performance, bias, red-team)
Approver(s)	Who approved (per Change Management)
Deployed by	Who executed the change
Rollout strategy	Full / canary / region-by-region / user-by-user
Rollback plan	Yes/No; method
Post-deploy check	What's monitored; result
User / customer notice	Yes/No; link to notice
Regulatory filings updated	EU database / CAIA public statement / other
Linked documents	Impact Assessment / Model Card / Incident records / tickets
Author of log entry	Name

Example entries

Entry #23

| Field | Value |

Date	2026-04-17
Version	v2.4
Previous version	v2.3
Change class	Moderate
Summary	Updated system prompt to handle price inquiries more accurately
Components changed	System prompt (support-chatbot)
Reason	Customer complaints about wrong pricing info
Expected impact	Fewer pricing errors; slightly longer responses
Testing	Functional test suite passed; price-query regression set added
Approver(s)	AI Governance Lead (async)
Deployed by	Engineering — Jane S.
Rollout strategy	Canary 10% → 50% → 100% over 3 days
Rollback plan	Revert prompt to v2.3; tested
Post-deploy check	Price-error rate dropped 60% in first 72h; no regressions detected
User / customer notice	Not required (quality improvement)
Regulatory filings updated	No
Linked documents	Impact Assessment v1.5; ticket PROD-4821
Author	Jane S.

Entry #24

Field	Value
Date	2026-04-25
Version	v3.0
Previous version	v2.4
Change class	Material
Summary	Model upgrade from claude-sonnet-4-5 to claude-sonnet-4-6
Components changed	Foundation model
Reason	Vendor announced deprecation of prior model; new version offers improved accuracy
Expected impact	Behavior shifts in ambiguous queries; some tone changes; lower latency
Testing	Full functional regression; bias regression (no subgroup change); red-team round (no new issues); performance benchmarking
Approver(s)	AI Review Committee (meeting 2026-04-22); Executive Sponsor
Deployed by	Engineering — Platform team
Rollout strategy	Canary 5% → 25% → 100% over 10 days
Rollback plan	Prior model remains available for 90 days
Post-deploy check	No behavior regressions at 72h; customer-support ticket volume stable
User / customer notice	Enterprise customers notified 14 days in advance; no individual-customer-facing UX changes
Regulatory filings updated	No (system not registered in EU database; CAIA statement unchanged)
Linked documents	Impact Assessment v2.0; Model Card v2.4 → v3.0; red-team report 2026-04-15
Author	Platform Lead

Entry #25 (Emergency)

Field	Value
Date	2026-05-02
Version	v3.0.1

Previous version	v3.0
Change class	Emergency
Summary	Urgent prompt patch to mitigate prompt-injection issue discovered in red-team
Components changed	System prompt; content filter
Reason	Researcher-reported vulnerability; exploitable within one session
Expected impact	Blocks injection vector; minor reduction in output flexibility
Testing	Targeted test on reported exploit; regression on primary use cases
Approver(s)	AI Governance Lead + Executive Sponsor (phone); full Committee post-hoc within 5 days
Deployed by	Security Lead
Rollout strategy	Full immediate
Rollback plan	Prior version preserved; monitoring for unintended effects
Post-deploy check	Exploit blocked; no new issues at 48h
User / customer notice	Internal only; enterprise customers notified via support
Regulatory filings updated	Security incident log updated; no external filings required
Linked documents	Incident record INC-2026-05-02; red-team ticket RT-447
Author	Security Lead

Review

- Monthly: business owner reviews log; spot-checks entries
- Quarterly: AI Governance Lead reviews logs across systems for patterns
- Annually: sample audit for completeness and accuracy
- On regulator inquiry: retrieve relevant entries

Preservation

- Don't delete entries; correct with a new entry if needed
- Archive with the system when retired (see Retirement Checklist)
- Retention aligns with sector rules and the longer of: operational need, EU AI Act 10-year (for high-risk), sector-specific retention, or 3 years minimum
